

# Our contribution to sustainability.

Learn more about sustainability

## Legacy

Rooted in Basel, local engagement plays an important role for us. That's why we consciously support our cooperation partners in the city.

## Catering: tasteful and green

Our catering partner offers sustainable and regional solutions – from demand-based purchasing and reusable tableware to creative veggie days.

## «Reduce – Reuse – Recycle»

Switzerland is a world champion in recycling. Our partner SRS ensures the proper disposal of recyclable materials.

Together, we offer circular Cradle-to-Cradle carpets as well as reusable rental furniture, carpet tiles, and modern event technology.

## 100% green electricity

All of Basel, including our venues, is powered by electricity from renewable energy sources. In addition, with our solar panels on the green roof, we also generate electricity ourselves.

## Efficient transport

Our logistics partner Sempex relies on scheduled and fully optimized transport operations.

## ISO 9001 + Swisstainable

The Messe and Congress Center Basel is certified according to ISO 9001 (quality management) and, like many hotels, has been awarded the Swisstainable label.

## Diversity, inclusion and accessibility

In line with our Code of Conduct, everyone is welcome – especially young talents. Our employees benefit from local perks such as meal vouchers and job tickets, and both staff and guests can move around our premises completely barrier-free.

## Free, environmentally friendly mobility

Basel is located in the heart of Europe and can be reached in a climate-neutral way by train; guests from Germany can travel conveniently with the DB event ticket. Our centrally located venues are within walking distance or easily accessible by public transport, which hotel guests can use free of charge with the BaselCard.

## Strategic focus

MCH Group is currently developing a sustainability strategy, reporting in accordance with GRI standards, calculating its environmental footprint, and offsetting business-related air travel.

## Energy-efficient hall

Our Hall 1, designed by Herzog & de Meuron, is certified with the Minergie label.
