| All halls                              | 12 to 20 |

# THE FOLLOWING ALSO APPLIES

- Dimensions in the approval artwork (GzD)\* must absolutely be checked once more before production. We accept no costs for elements produced incorrectly after release of the GzD\*.
- Please announce installation and dismantling dates at the latest after receiving the GzD\*.
- Installation points must be determined and mounted by the CCB.
- Print files are usually created by the customer and should arrive at Richnerstutz two weeks before installation. On request we are happy to assist with the creation or correction of print files.
- If corrections or changes to the print file are made by us, an additional CHF 120.- per hour will be charged.
- Data format for production: see info sheet.
- CHF 30.- per subject is charged for file processing from print-ready data.
- Please urgently register on-call services for Saturday and Sunday as well as evening on-call service from 18:00 to 22:00 with Richnerstutz 3 weeks in advance. Costs are calculated based on occupancy.
- Please register weekend installations with Richnerstutz 3 weeks in advance whenever possible.
- If a lifting platform is provided on-site, please inform Richnerstutz in good time.
- Please always clearly communicate what may be disposed of during dismantling.
- The prices for installation / dismantling listed in this brochure are reference prices only. The actual effort for delivery and installation / dismantling will be invoiced.
- All listed prices exclude VAT and transport.
- Net prices from Richnerstutz AG to MCH Basel!

# TECHNICAL DATA SHEET

## General notes

Please always design in the correct proportions relative to the final format. For large-format artwork, the data may be supplied at a smaller scale (e.g. 25 %). In any case, please provide us with the binding final dimensions.

For displays, please consult with us, as different manufacturing dimensions (visible size and production size) need to be taken into account. This avoids unwanted blank flashes.

## Data delivery

Data delivery via:  
graphicservices@expomobilia.com or by WeTransfer (wetransfer.com).

Please provide us with the file formats PDF, EPS, or the open/source files.

## Software

We use the current Adobe applications (InDesign, Photoshop, Illustrator, Acrobat).

## Colour space / colours

If possible, please work in the CMYK colour space. We use the «Coated FOGRA39» profile. Pantone colours are simulated in CMYK and cannot always be reproduced exactly.

## Fonts

All fonts used must be embedded in the document, or preferably converted to outlines or supplied separately.

## Bleed / crop marks

Please add at least 4 mm bleed per side to the final format. This bleed is essential depending on the substrate. If possible, do not include crop marks or other auxiliary marks.

## Overprint

Overprint is not required in digital printing. Please make sure no elements are set to «Overprint».

## Foil cutting

If the foils are to be cut to a special shape, a cut path is mandatory. This path should have the following properties:

- closed vector path
- Colour value « CMYK »
- The colour must be defined as a spot colour and named «CutContour».
- The vector path must be set to «Overprint».

## White printing

The following points must be observed for white printing:

- Colour value « CMYK »
- The colour must be defined as a spot colour and named «Spot».
- The areas that should be printed white must be filled with this colour and set to «Overprint».

Please send us the open native data so that we can make any necessary adjustments.

## Image resolution

| Print size              | Minimum dpi   | Optimum dpi |
|-------------------------|---------------|-------------|
| up to 5 m <sup>2</sup>  | 80 to 100 dpi | 150 dpi     |
| up to 10 m <sup>2</sup> | 55 dpi        | 75 dpi      |
| up to 50 m <sup>2</sup> | 35 dpi        | 55 dpi      |
| over 50 m <sup>2</sup>  | 20 dpi        | 40 dpi      |

Printing data below the minimum resolution leads to a reduction in quality and is at the sole responsibility of the orderer. In such cases, please request a chargeable print proof.

## Approval to print (GzD)

On request we are happy to send you an approval PDF (GzD) based on the print-ready file. If this is not requested by the customer, you agree that the data will be produced as supplied.

# FABRIC GRAPHIC DATA SHEET

## General information

Please always add at least 20 mm bleed to your print data and do not use crop marks, registration marks or colour bars in the PDF.

Fonts should be embedded or converted to outlines.

Please use an image resolution of at least 50 dpi at final size.

Spot colours (Pantone, RAL, HKS, etc.) cannot be printed; they are only simulated in digital printing. This means we cannot guarantee exact colour results for spot colours.

## Format

Always set up the desired format with width + 20 mm, height + 20 mm. (Format includes bleed.)

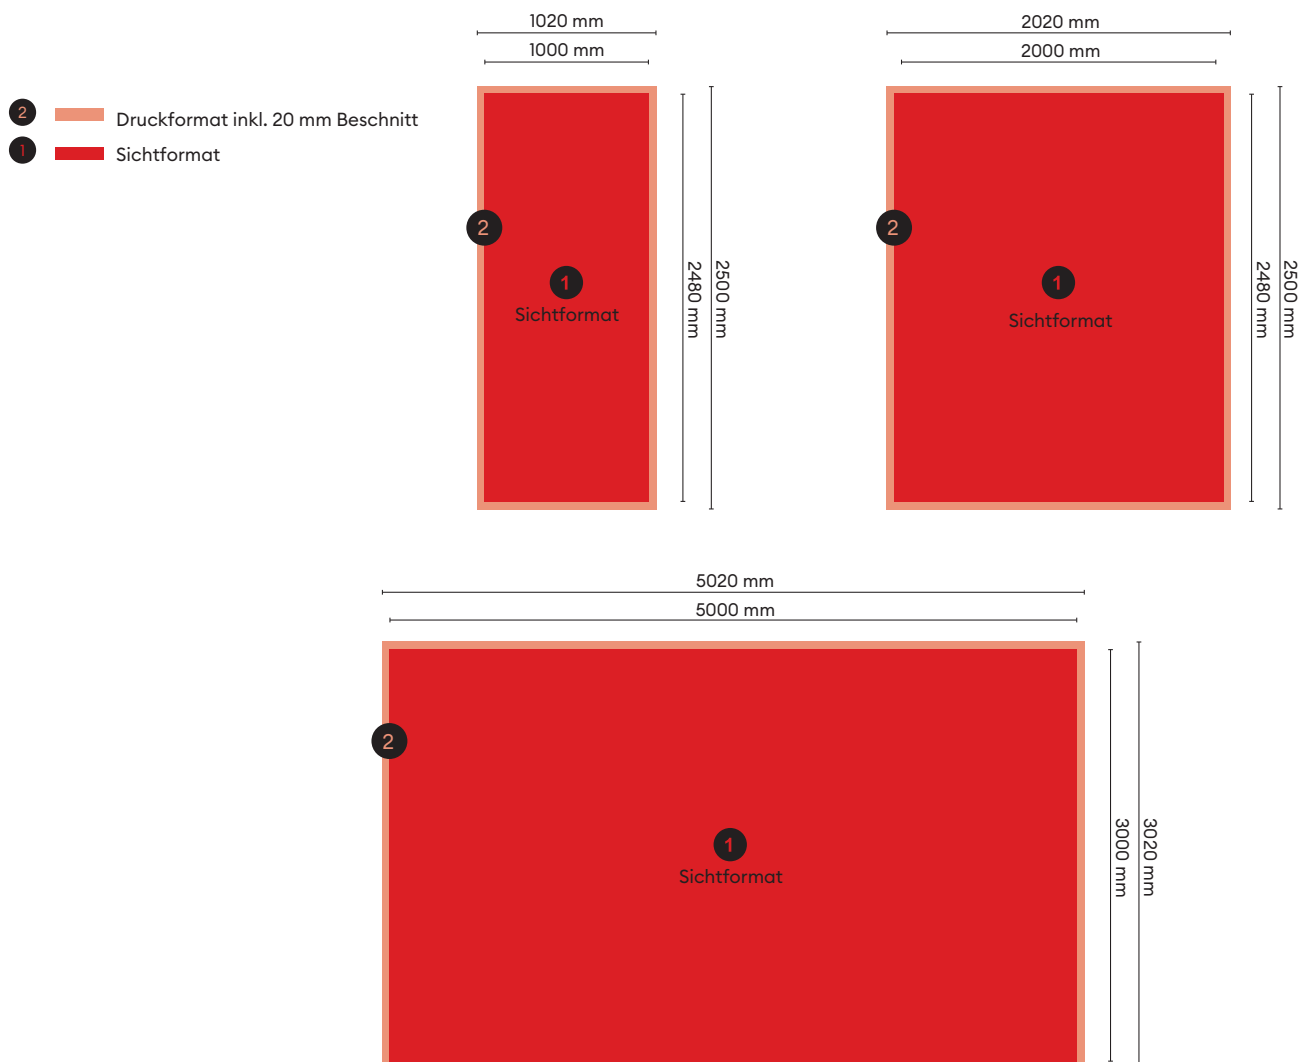

Example:

Visible size: 1000 × 2480 mm

Print size: 1020 × 2500 mm

Please set up print data under 5 m<sup>2</sup>.

Please set up print data over 5 m<sup>2</sup>.

# DATA SHEET ROLL-UP

## General information

Please always add at least 4 mm bleed to your print data and do not use crop marks, registration marks or colour bars in the PDF.

Fonts should be embedded or vectorised.

Please use an image resolution of at least 150 dpi at final size.

Spot colours (Pantone, RAL, HKS, etc.) cannot be printed; they are only simulated in digital printing. This means we cannot guarantee exact colour results for spot colours.

## Format

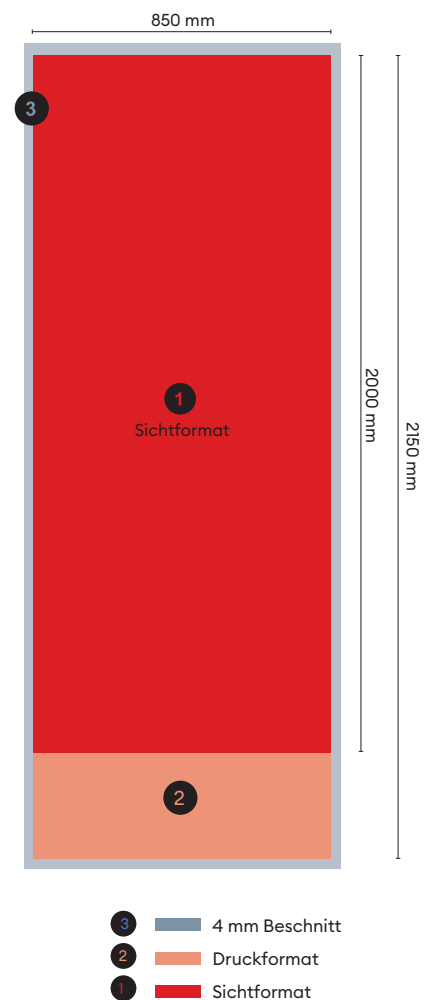

Always set up the desired format with height + 150 mm. The bottom 150 mm is needed for the feed.

Example:

Visible size: 850 × 2000 mm

Print size: 850 × 2150 mm

Please always set up the print data at 1:1 scale.

# ROLL-UP

**Production and Installation prices incl. Rental**  
 Production costs incl. file processing

|              |           |
