Furniture- Podia / Desks

Speaker's lectern – electronic inscriptions

As an alternative to printed nameplates, it is also possible to use electronic inscriptions with the speaker's lecterns. Their optical appearance has an optimum effect especially in bigger rooms. In terms of content, the screens can be designed in two sections with names and an individual design or can be configured over their full area.

Advantages

- Rapid name changeover
- Short-term changes in the order of speakers pose no problems
- Switchovers can be easily operated from the control room by a technician/hostess/room assistant, for example
- Technical information/handling
- Screen support, 3-stage height-adjustable
- Variable ratio, picture sizes of 40"-50" possible
- Content can be compiled using the PowerPoint template

Content/Template

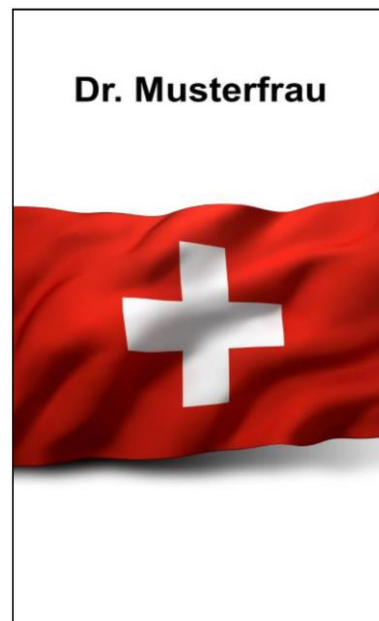

The PowerPoint template is provided by the Congress Center and can be filled out with the desired content on a customized basis.

Recommended font size: 50 - 54

Recommended font: Simple, clear fonts (Arial, Times New Roman, Calibri)

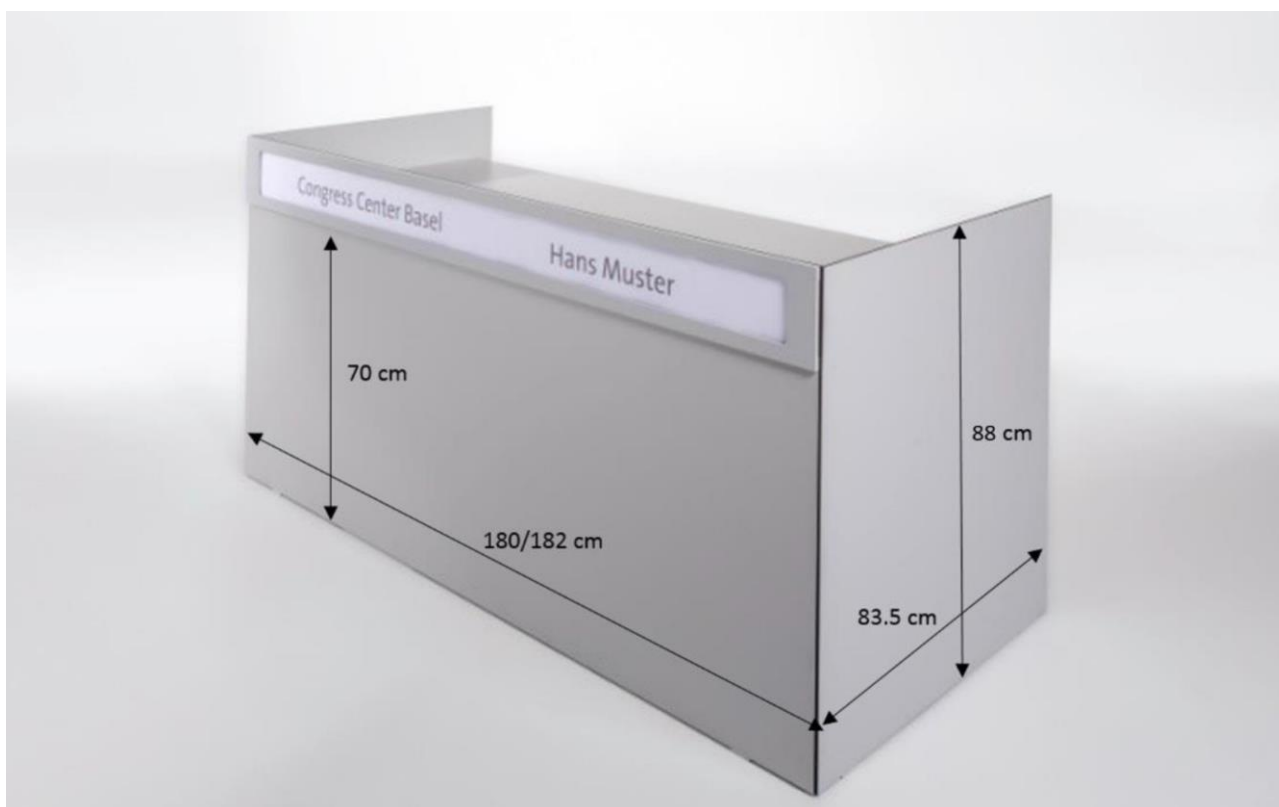

Pictures: Any desired pictures can be used

Logos and colouring: The screen can be configured on the basis of corporate design or as required.

Furniture – Podia / Desks
