

Our contribution to sustainability

Legacy

Rooted in Basel, local commitment plays a key role for us, which is why we consciously support our cooperation partners in the city.

Strategic focus

In its sustainability activities, MCH Group focuses on the following material topics: Resources; Logistics & Transportation; Energy; Mobility; Supply Chain; Diversity, Equality & Inclusion; Learning & Development. It reports in accordance with GRI and discloses its ecological footprint on an annual basis.

«Reduce – Reuse – Recycle»

Switzerland is a world champion in recycling. Our partner SRS ensures that recyclables are disposed of correctly.

With our partner network, we offer cradle-to-cradle recyclable carpeting and a wide selection of re-usable rental furniture, carpet tiles and state-of-the-art event technology.

100 % green electricity

The whole of Basel, including our site, is powered with electricity from renewable energies. And, with the solar cells on our green roof, we are also electricity producers.

Efficient transport

Our logistics partner Sempex focuses on synchronised and full-truck-load logistics.

Catering: tasty and green

Our caterer offers sustainable, regional solutions – from needs-based purchasing, via reusable tableware, through to creative veggie days.

Diversity, inclusion and accessibility

In line with our Code of Conduct, we have no barriers here and everyone is welcome – especially young talents. Our employees benefit from a range of local perks, including meal vouchers and the “Job-Ticket”.

Free, environmentally-friendly mobility

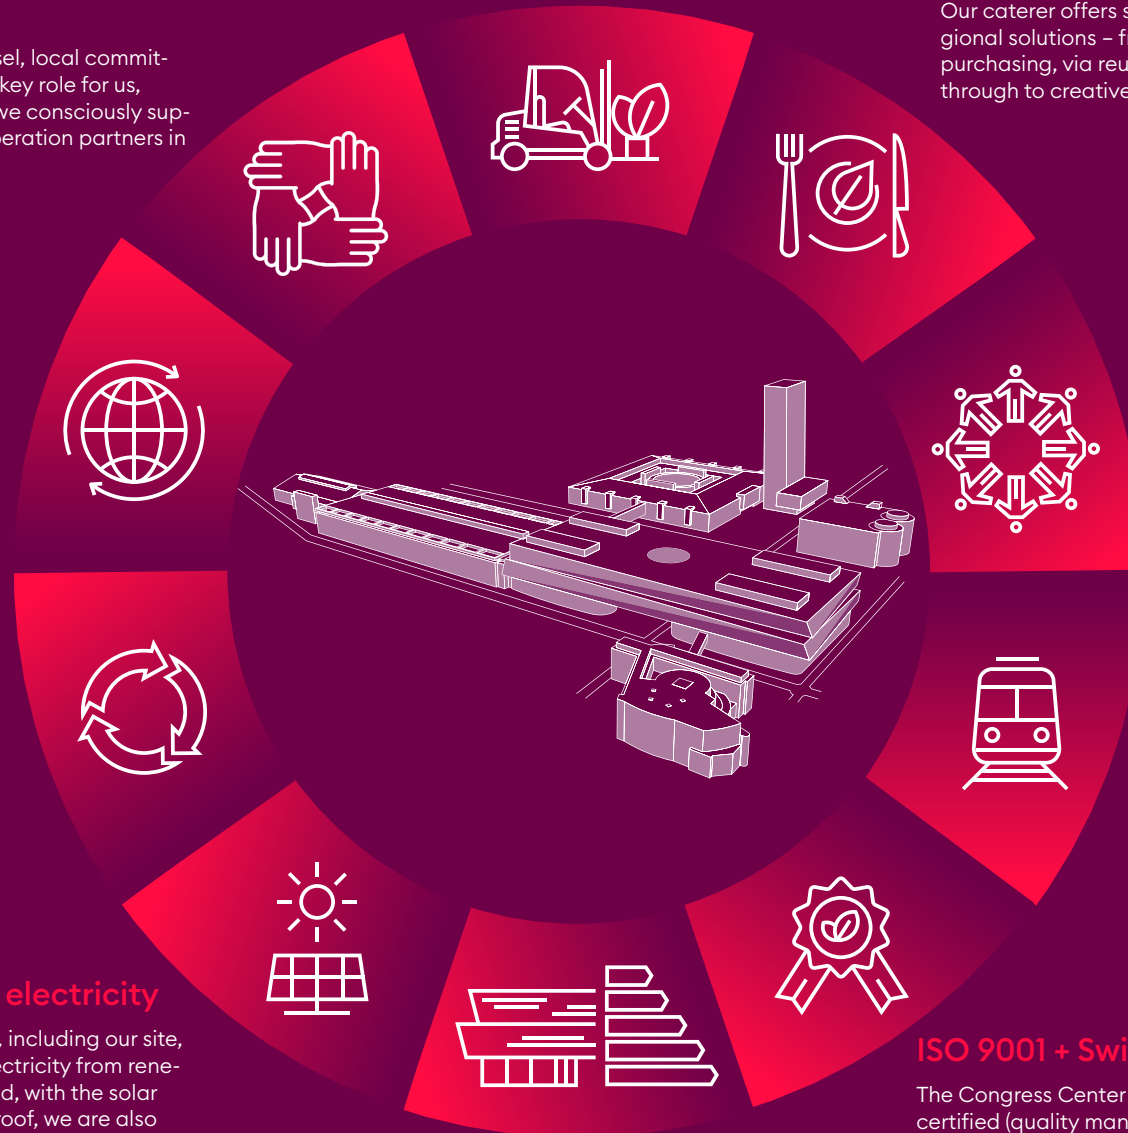

Basel is at the heart of Europe with climate-neutral access by train. Guests from Germany can even travel to us on a DB Event Ticket. We are centrally located in the city and readily accessible on foot or with the excellent public transport network that all Basel hotel guests can use for free with the BaselCard.

ISO 9001 + Swisstainable

The Congress Center Basel is ISO9001-certified (quality management) and, like many hotels, has been awarded the Swisstainable- label.

Energy-efficient hall

Our Hall 1, designed by Herzog & Meuron, has been awarded the Minergie label.
